

BONALDO

Antibes

Designer: Elle Lab

Antibes is a storage system designed for the bedroom area that draws inspiration from the traditional shapes of dressers and bedside tables and then deviates from them, taking the geometry of the designs to an extreme. The asymmetrical metal base supporting the lacquered wooden structure adds a distinctive original and modern touch. On one side of the element the base runs vertically along the entire front section of the dresser or bedside table until it

touches the ground; on the other side, it becomes slender and thin, as though wishing to disappear from view. The elements in the Antibes collection are available in three different colour combinations: sand lacquered wooden frame and taupe-coloured metal base, rope lacquered wooden frame and bronze finish metal base, mud lacquered wooden frame and lead finish metal base.
